

# INDUSTRIAL SUPPLY TRAINING & RESOURCE GUIDE

ABRASIVES			
Abrasives & Surface Conditioning Products	3M	Training	3M Provides on-site training on use of abrasives, tools and methods. 3M also offers on-site technical assistance for development of abrasive processes.
Abrasives & Surface Conditioning Products	Standard Abrasives	Training	Standard Abrasives offers on-site training on use of abrasives. They also offer any technical assistance that might be needed.
AIR FILTRATION			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Air Filtration	Sierra Ridge	Site Survey	We can survey filter usage within your operations and propose cost saving alternatives.
CHEMICALS			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Lubricants, MRO Chemicals	CRC	On-site training	CRC training will help minimize the risks and costs associated with the acquisition, use and disposal of MRO Chemical Products. CRC will assist with compliance for 29CFR 1910.1200. Training opportunities include: Certified Hazard Communication Training, Application training and Hazard Waste Handling training along with customized training options based on need.
Adhesives, Sealants, Coatings, Lubricants	Loctite	On-site consolidation, training, plant surveys, application review & maintenance reliability training	Loctite will conduct on-site training to review latest adhesive, sealant and coating technologies. Will conduct plant surveys and review applications. Educate technicians and mechanics on MRO best practices. Conduct chemical consolidation programs & leak cost surveys at plants.
Lubricants, Degreasers, Aerosols	LPS	On-site evaluation & Surveys	LPS conducts a MRO Chemical Safety Seminar. LPS will review your chemicals usage and storage for effectiveness and compliance with government regulations. A written report will be provided. LPS also reviews what to look for on product labels and how to read MSDS, what to look for in the workplace etc. When training is completed, a written test is provided along with a certificate of training completion. LPS also provides MRO chemical surveys which can be used to reduce redundant inventory and address concerns regarding environmental, health and safety. In addition to training, LPS also provides a "documented cost savings" program.
Paint	Rustoleum	On-Site Evaluation	Rustoleum will match colors and recommend appropriate floor and roof coating to be used.
Paint	Rustoleum	Inspection & Color Matching	Rustoleum will match colors and recommend appropriate floor and roof coatings to be used.

CUTTING TOOLS			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Inserts	Sandvik	Training and Evaluation	Sandvik will conduct timings and trainings to enhance the performance of your inserts and cutting tools and ascertain the right product for your application.
Taps and Dies, Reamers	Union Twist Drill/Precision	Training and Evaluation	UTD/Precision will conduct trainings to enable you to enhance the performance of your taps and dies and ensure you're using the the right product for your application.
End mills, drill bits, carbides, burs	SGS	Training and Evaluation	SGS will conduct trainings to enhance the performance of your bits and mills and help ascertain the right product for your application.
Bandsaws	Simonds	Training and Evaluation	Technical assistance and process evaluation and improvement.
HAZ-MAT			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Sorbents, Spill Kits, Spill Containment	Universal Products	Training Seminars	Training reviews MRO, EPA & OSHA standards and Universal Products conducts Spill Kit preparedness assessments.
Lifting	Campbell	Training	Campbell has video training materials on chain sling safety and chain use safety.
Hoists	Coffing	On-Site Survey and Evaluations	Coffing will survey all hoists on site and evaluate their safety and performance.
Lifting	Lift-All	Inspection and Evaluation	Lift All will perform a lifting sling inspection and evaluation.
PAPER PRODUCTS			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Paper Products	Kimberly Clark	On-Site Survey	Will review and catalog products in use and make recommendations for consolidation and appropriate products in all applications. They will also evaluate rag products in use and make recommendations and cost evaluations regarding replacement with paper products.
Wipers	Kimberly Clark	Survey and Cost Analysis	Kimberly Clark will survey the use of wiping products within your facilities and propose cost saving alternatives and comparison to rags or other wiping products.
INDUSTRIAL PLASTICS			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Plastics	Rubbermaid	On-site training seminars, surveys and testing.	Rubbermaid can provide on-site safety training which covers slip, trip and fall hazards, area safety and pedestrian safety. Rubbermaid can also evaluate recycling, transportation and storage systems.
Wipers	Kimberly Clark	Survey and Cost Analysis	Kimberly Clark will survey the use of wiping products within your facilities and propose cost saving alternatives and comparison to rags or other wiping products.
Wipers	Kimberly Clark	Survey and Cost Analysis	Kimberly Clark will survey the use of wiping products within your facilities and propose cost saving alternatives and comparison to rags or other wiping products.
Plastics	Rubbermaid	On-site training seminars, surveys and testing.	Rubbermaid can provide on-site safety training which covers slip, trip and fall hazards, area safety and pedestrian safety. Rubbermaid can also evaluate recycling, transportation and storage systems.

SAFETY			
Respiratory	3M	Training & Certification	3M provides training on all safety products including respiratory protection. 3M also conducts “train the trainer” classes to teach trainees how to train and fit test employees who wear 3M respirators. 3M provides SCBA and supplied air respirator training for 3M products. 3M can provide training to satisfy OSHA 29CFR1910.34 requirements.
Respiratory	Bullard	Training	Bullard will conduct safety meetings on supplied air respirators.
Fall Protection	DBI	Training	DBI offers safety awareness training including drop tower training for the proper use of fall protection. During a fall protection safety awareness meeting, DBI reviews the proper use of harnesses, lanyards, self-retracting lifelines and anchorage connector points as well at harness donning, lanyard and anchorage connection. DBI also reviews compliance issues with ANSI Z359.1-1992, ANSI A10.14-1991 & OSHA 1910.146.
Respiratory	Drager	Training & Repair	Drager will train employees on SCBA instruments & air purifying
Hand Cleaners	Gojo	Skin Safety Program	Gojo will provide a skin care video guide and trainers guide. They will review products in use and make recommendations for consolidation and appropriate products in all applications.
Ergonomics and High-Visability	Ergodyne	Training	Explanation and clarification of the high visibility garment requirements: ANSI/ISEA 107-2004. Discussion of the harmful effects of impact and vibration on the hands and arms and the ANSI 3.40 standard.
Batteries	RayOVac	Training/Safety Data	RayOVac will provide up-to-date MSDS information as well as performance test data. They conduct on-site training for flashlight and batteries.
Hand Protection	PIP Gloves	Training	PIP will conduct training on how to protect your hands and arms.
Protective Gloves & Clothing	Ansell	On-site Evaluation	Ansell will perform a protective glove and clothing audit that evaluates applications within your plant and the PPE cost, medical cost and indemnity cost associated with those applications. This service is free of charge and also fulfills OSHA PPE evaluation requirements.
Air Purification & Monitoring	Gillian	Training & Repair	Gillian will train employees on their equipment.
Ladders	Louisville	Safety Seminar	Safety seminars cover proper use and inspection of ladders. Training includes: ladder inspections, step and extension safety, rolling warehouse and rolling tower scaffolding. Videos, booklets and testing are available upon requests. Louisville will review OSHA guidelines and ANSI standards to insure compliance.
Air Purification & Monitoring	Industrial Scientific	Training & Repair	Industrial Scientific will train employees on the use of their equipment. They can provide expert evaluation for product application assistance. Industrial Scientific may also offer a trade-in program on new equipment.

SAFETY			
Ladders	Louisville	Safety Seminar	Safety seminars cover proper use and inspection of ladders. Training includes: ladder inspections, step and extension safety, rolling warehouse and rolling tower scaffolding. Videos, booklets and testing are available upon request. Louisville will review OSHA guidelines and ANSI standards to insure compliance.
Air Purification & Monitoring	Industrial Scientific	Training & Repair	Industrial Scientific will train employees on the use of their equipment. They can provide expert evaluation for product application assistance. Industrial Scientific may also offer a trade-in program on new equipment.
Fall Protection	Miller	Site evaluation & compliance training	Miller will offer fall protection training including drop tower training for the proper use of fall protection. Also offer safety at heights training, protective clothing levels A-D, cut resistant gloves, Industrial footwear, traffic control products and confined space entry. Miller can cover the following: OSHA 1910.146, 1926.104, 1926.105 subpart M & R, 1926.450-454, 1910.66, 1910.27 & 1910.28.
Respiratory	Moldex	Training	Moldex will train employees on air purifying respirators. Moldex also offers hearing conservation training programs.
Safety Supplies	North	Training	North's "Train-the Trainer Program" instructs employees in the safe use and application of respiratory protection equipment. The program is geared to prepare employees to conduct fit test training in their own facilities.
Fall Protection	Rose	Training	Rose will offer fall protection training and demonstrations including drop tower training for the proper use of fall protection.
Lock out/Tag out	Brady	Training/Compliance	Brady makes available video training in proper use and compliance with lock-out/tag-out practices.
Safety Signs	Brady	Compliance Survey	Our resources will survey your plants for OSHA compliance and offer recommendations and training.
Hearing Protection	Howard Leight	Training and Evaluation	Howard Leight offers training and evaluation assistance for hearing conservation. The training program includes media for training.

SAFETY			
Matting	Andersen Mat	On-site evaluation	Andersen Mat will evaluate worker safety and ergonomics for employees who stand in one place for long periods of time. Risk analysis will be provided along with national data regarding worker injury due to poor matting.
Hearing Protection	Bacou-Dalloz/ Peltor	On-site Evaluation & Training	Dalloz Safety will conduct a seminar on site to explain how to prevent noise-induced hearing loss in your workplace. The seminar includes: On-site noise checks, training and assistance in selecting the proper hearing protection devices for your environment and training on OSHA requirements.
Eye Protection	Bacou-Dalloz/ Uvex	On-site Evaluation	Dalloz Safety will conduct on-site surveys to gain user compliance with NIOSH standards for eyewash station hazards, and educate workers on the proper use and location of eye wash stations.
Flammable Liquid Storage	Justrite	On-site Evaluation	A STUDE survey will be conducted for your facility. Observations and recommendations on how to properly Store, Transfer, Use, Dispose of Flammable Liquids
Respiratory	Bacou Dalloz/ Wilson	Training	Dalloz Safety can provide training on the use, care and maintenance of respiratory products. Evaluation of on-site respiratory hazards.
TOOLS			
COMMODITY	MANUFACTURER	RESOURCE TYPE	DESCRIPTION OF RESOURCE
Power Tools	DeWalt	Training	DeWalt can provide a worker training program for the use of power tools. Safety training sessions last 30 minutes and include a 12 minute video. The course includes a certificate presented to each worker completing the course.
Fittings and Valves	Dixon	Inspection and Analysis	Dixon will inspect fittings within the plant for safety and leaks and provide a written analysis.
Hydraulic Power	Enerpac	Training	Enerpac makes available video training regarding the safety use of industrial hydraulic power systems. Hose and Coupling Safety Survey is also available.
Hand Tools	Stanley Proto	Training	Stanley Proto can provide a safety training program for the use of hand tools. A video training program is included.
Repair Products	Devcon/Permatex	Maintenance Seminar	Will review metal, rubber and concrete repair products plus structural adhesives in use and make recommendations.
